

financial interest consists of securities or other evidences of debt of the second institution that amount to:

(1) Less than 5 percent of the total portfolio of investments of the owning institution,

(2) Less than 5 percent of the total outstanding amounts of the same classes of securities of the second institution, and

(3) Less than would be needed to obtain effective control of the second institution,

then the interest is too remote and inconsequential to affect the integrity of the employee's services to the Government.

(d) *Policy determinations.* Where a general policy determination of the Government might constitute a "particular matter" under 18 U.S.C. 208(a) and might affect the home institution of an NSF officer or employee, but only in the same manner as all similar institutions, the officer or employee may participate in that determination.

(e) *Support services for National Science Board tasks and responsibilities.* A member of the National Science Board may need professional, clerical, and administrative services to support the member's personal efforts to carry out Board tasks and responsibilities. With the approval of the Director and the Chairman of the National Science Board and in accordance with other laws and regulations, the NSF may contract with the home institution of the member to provide such services. The institution may receive reimbursement of all allowable costs, but no profit or fee. In such circumstances any financial interests the institution might have are normally too inconsequential to affect the integrity of the services provided by the Board member to the Government.

PART 689—RESEARCH MISCONDUCT

Sec.

689.1 Definitions.

689.2 General policies and responsibilities.

689.3 Actions.

689.4 Role of awardee institutions.

689.5 Initial NSF handling of misconduct matters.

689.6 Investigations.

689.7 Pending proposals and awards.

689.8 Interim administrative actions.

689.9 Dispositions.

689.10 Appeals.

AUTHORITY: 42 U.S.C. 1870(a).

SOURCE: 67 FR 11937, Mar. 18, 2002, unless otherwise noted.

§ 689.1 Definitions.

The following definitions apply to this part:

(a) *Research misconduct* means fabrication, falsification, or plagiarism in proposing or performing research funded by NSF, reviewing research proposals submitted to NSF, or in reporting research results funded by NSF.

(1) *Fabrication* means making up data or results and recording or reporting them.

(2) *Falsification* means manipulating research materials, equipment, or processes, or changing or omitting data or results such that the research is not accurately represented in the research record.

(3) *Plagiarism* means the appropriation of another person's ideas, processes, results or words without giving appropriate credit.

(4) *Research*, for purposes of paragraph (a) of this section, includes proposals submitted to NSF in all fields of science, engineering, mathematics, and education and results from such proposals.

(b) *Research misconduct* does not include honest error or differences of opinion.

§ 689.2 General policies and responsibilities.

(a) NSF will take appropriate action against individuals or institutions upon a finding that research misconduct has occurred. Possible actions are described in § 689.3. NSF may also take interim action during an investigation, as described in § 689.8.

(b) NSF will find research misconduct only after careful inquiry and investigation by an awardee institution, by another Federal agency, or by NSF. An "inquiry" consists of preliminary information-gathering and preliminary fact-finding to determine

National Science Foundation

§ 689.3

whether an allegation or apparent instance of research misconduct has substance and if an investigation is warranted. An investigation must be undertaken if the inquiry determines the allegation or apparent instance of research misconduct has substance. An “investigation” is a formal development, examination and evaluation of a factual record to determine whether research misconduct has taken place, to assess its extent and consequences, and to evaluate appropriate action.

(c) A finding of research misconduct requires that—

(1) There be a significant departure from accepted practices of the relevant research community; and

(2) The research misconduct be committed intentionally, or knowingly, or recklessly; and

(3) The allegation be proven by a preponderance of evidence.

(d) Before NSF makes any final finding of research misconduct or takes any final action on such a finding, NSF will normally afford the accused individual or institution notice, a chance to provide comments and rebuttal, and a chance to appeal. In structuring procedures in individual cases, NSF may take into account procedures already followed by other entities investigating or adjudicating the same allegation of research misconduct.

(e) Debarment or suspension for research misconduct will be imposed only after further procedures described in applicable debarment and suspension regulations, as described in §§ 689.8 and 689.9, respectively. Severe research misconduct, as established under the regulations in this part, is an independent cause for debarment or suspension under the procedures established by the debarment and suspension regulations.

(f) The Office of Inspector General (OIG) oversees investigations of research misconduct and conducts any NSF inquiries and investigations into suspected or alleged research misconduct.

(g) The Deputy Director adjudicates research misconduct proceedings and the Director decides appeals.

(h) Investigative and adjudicative research misconduct records maintained by the agency are exempt from public

disclosure under the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act (5 U.S.C. 552a) to the extent permitted by law and regulation.

§ 689.3 Actions.

(a) Possible final actions listed in this paragraph (a) for guidance range from minimal restrictions (Group I) to the most severe and restrictive (Group III). They are not exhaustive and do not include possible criminal sanctions.

(1) *Group I actions.* (i) Send a letter of reprimand to the individual or institution.

(ii) Require as a condition of an award that for a specified period an individual or institution obtain special prior approval of particular activities from NSF.

(iii) Require for a specified period that an institutional official other than those guilty of misconduct certify the accuracy of reports generated under an award or provide assurance of compliance with particular policies, regulations, guidelines, or special terms and conditions.

(2) *Group II actions.* (i) Totally or partially suspend an active award, or restrict for a specified period designated activities or expenditures under an active award.

(ii) Require for a specified period special reviews of all requests for funding from an affected individual or institution to ensure that steps have been taken to prevent repetition of the misconduct.

(iii) Require a correction to the research record.

(3) *Group III actions.* (i) Terminate an active award.

(ii) Prohibit participation of an individual as an NSF reviewer, advisor, or consultant for a specified period.

(iii) Debar or suspend an individual or institution from participation in Federal programs for a specified period after further proceedings under applicable regulations.

(b) In deciding what final actions are appropriate when misconduct is found, NSF officials should consider:

(1) How serious the misconduct was;

(2) The degree to which the misconduct was knowing, intentional, or reckless;
